

## ACO ThresholdDrain

## Cantilever ThresholdDrain

### PORTFOLIO

#### The Saint Apartments

The Saint is a new apartment block on St Benedicts Street, Auckland. It features bold architectural statements, joining the 19th and 21st Century architecture either side of the property. Shortlisted for an NZIA award, the project was designed to be completed on a budget yet have a more upscale finish. The main entrance to the building uses a flush entrance and floor to ceiling glass to welcome you into the atrium. To manage surface water and collect runoffs from the facade, designers chose ACO's Cantilever ThresholdDrain

#### Benefits

- ACO's Cantilever ThresholdDrain stands out with its code compliance, functionality and aesthetics.
- Ductile Iron grate with **Heelsafe**® and Anti-Slip complements the joinery, providing a pedestrian friendly surface water management.
- The system provides E2 compliant level threshold drainage, complying with AS 1428.2 (Clause 9c), Access and Mobility, ensuring safe passage of walking canes and wheelchairs.
